Subject: Microsoft Settlement

Dear Sirs,

I beleive that the current Microsoft settlement is fair. Further action by the Federal Government as well as the 9 states who continue to fight Micrsoft only serves to weaken an industry already battered by foriegn competitors using unfair trade practices, an economic recession, major downturn in capital spending as well as other factors. Let's not turn the US's future competitive advantage in software and all- into todays electronics market dominated by Asian COUNTRIES and manufacturers. I'm the owner of a small business and the less Government interaction / intervention- in business (Federal-State-Local) the better off EVERYONE is.
